

# Large Wall Mounted Locking Cabinet

## Overview

The Large Wall Mounted Locking Cabinet is the ideal locking cabinet for medication security in patient rooms where you have limited flat surfaces to mount the locking cabinet or if you prefer the convenience of a wall-mounted locking cabinet.

## Features

- Electronic Keypad Lock (requires 2-AAA batteries included) and has a low battery alarm feature.
- Safety backup key override lock comes standard on all units and is supplied with two metal keys.
- Standard with two ¼-20 flat head screw mounting holes in the back panel for a permanent mount (Screws not included).
- White PVC construction cabinet.
- Approximate dimensions: 16"W x 18"H x 8"D
- Approximate weight: 16 lbs.

Increase Safety & Infection Control

Improve Compliance

Secure Medications

Increase Efficiency

Cost-Effective & Reduce Waste

## Customizations

### Door

**Clear Door**  
for ease of visibility.

**Frosted Door**  
for HIPAA compliance.

**White Door**  
for privacy.

### Lock

**Self-Locking Lock**  
Standard, self-locking lock automatically locks the box when the door is closed.

**Manual Shared Use Lock**  
This lock allows for a revolving use code and requires the lock knob to be rotated to the locked/unlocked position.

**Audit Trail Lock**  
Provides a time and date stamp record of access for up to 20 different user codes.

**RIEMER**
